

## Genus *Parendomicrobium*

### Etymology

[Par.en.do.mi.cro'bi.um] L. adj. *par*, equal, like; N.L. neut. n. *Endomicrobium*, a bacterial genus; N.L. neut. n. *Parendomicrobium*, a bacterial genus like Endomicrobium

### Nomenclatural type

Species *Parendomicrobium reticulitermitis*<sup>Ts</sup>

### Description

A bacterial genus defined by metagenome-assembled genomes. The genus is defined by phylogenomic analysis as a monophyletic group that shows a relative evolutionary divergence (RED) similar to that of the neighboring genera.

### Classification

*Bacteria* » *Elusimicrobiota* » *Endomicrobia* » *Endomicrobiales* » *Endomicrobiaceae* » *Parendomicrobium*
