

## Species *Pantoea haifensis*

---

### Etymology

[hai.fen'sis] N.L. fem. adj. *haifensis*, of Haifa, Israel, where this organism was isolated from

### Nomenclatural type

[NCBI Assembly: GCA\\_018842655.1](#)<sup>TS</sup>

### Description

This species currently consists of the genome of a single strain, EnvH, which was isolated from asphalt in Haifa, Israel. The pairwise ANI values between this species and the two closest relatives, GCF\_018842675.1 and GCF\_014946725.1, are below 80% confirming that this species is distinct from those with which it shares a most recent common ancestor.

### Classification

*Bacteria* » *Pseudomonadota* » *Gammaproteobacteria* » *Enterobacterales* » *Erwiniaceae* » *Pantoea* » *Pantoea haifensis*
