

## Species *Pantoea floridensis*

### Etymology

[flo.ri.den'sis] N.L. fem. adj. *floridensis*, of or from Florida, referring to where this organism was isolated from

### Nomenclatural type

[NCBI Assembly: GCA\\_900215435.1](#) <sup>Ts</sup>

### Description

The species consists of the genome of a single strain, JKS000234. Its source of isolation is a fungus-farming ant garden in Wekiwa Springs State Park, Apopka, Florida. This species shares a most recent common ancestor with *P. variicola* sp. nov. The ANI between the genomes of the two species is below 90%.

### Classification

*Bacteria* » *Pseudomonadota* » *Gammaproteobacteria* » *Enterobacteriales* » *Erwiniaceae* » *Pantoea* » *Pantoea floridensis*
