

## Species *Endomicrobiellum calonymphae*

### Etymology

[ca.lo.nym'phae] N.L. gen. n. *calonymphae*, of Calonympha, referring to the host flagellate.

### Nomenclatural type

[NCBI Assembly: GCA\\_031269945.1](#) <sup>Ts</sup>

### Description

The species comprises only metagenome-assembled genomes. The species includes all bacteria with more than 95% average nucleotide identity (ANI) to the type genome. The GC content of the type genome is 32.4 mol% and the estimated genome size is 0.9 Mbp.

### Classification

Bacteria » Elusimicrobiota » Endomicrobia » Endomicrobiales » Endomicrobiaceae » *Endomicrobiellum* » *Endomicrobiellum calonymphae*
