

Genus *Nitrosomaritimum*

Etymology

[Ni.tro.so.ma.ri.ti'mum] L. neut. adj. *nitrosus*, nitrous; L. neut. adj. *maritimum*, of the sea; N.L. neut. n.

Nitrosomaritimum, referring to the organism as an ammonia oxidizer capable of converting ammonia to nitrite, distributed in coastal water and sediment

Nomenclatural type

Species *Nitrosomaritimum aestuarii*^{Ts}

Description

The name “*Nitrosomaritimum*” refers to the organism as an ammonia oxidizer capable of converting ammonia to nitrite (from the Latin “*nitrosus*”, full of natron; here intended to mean nitrous) and its habitat distribution in coastal water and sediments (from the Latin adjective ‘*maritimum*’, meaning coastal).

Classification

Archaea » Thermoproteota » Nitrosphaeria » Nitrosopumilales » Nitrosopumilaceae » *Nitrosomaritimum*
