

Order *Azoamicales*

Etymology

[A.zo.a.mi.ca'les] N.L. masc. n. *Azoamicus*, referring to the type genus *Azoamicus*; -ales, ending to denote an order; N.L. fem. pl. n. *Azoamicales*, the *Azoamicus* order

Nomenclatural type

Genus *Azoamicus*

Description

'*Candidatus Azoamicales*' (A.zo.a.mi.ca.les. N.L. masc. n. *Azoamicus*. type genus of the order; N.L. suff. -ales to denote an order; N.L. masc. pl. n. *Azoamicales*, the order of the genus *Azoamicus*). A bacterial order identified by metagenomic analyses and delineated according to Relative Evolutionary Distance by the Genome Taxonomy Database (GTDB). Phylogenetic analyses in this work have shown that the previously published '*Candidatus Azoamicus ciliaticola*' is assigned to an uncharacterized order with provisional designation UBA6186. Consequently, we propose to rename the UBA6186 order to '*Candidatus Azoamicales*'. the type genus of the order is '*Candidatus Azoamicus*'. The order is assigned to the class Gammaproteobacteria.

Classification

Bacteria » *Pseudomonadota* » *Gammaproteobacteria* » *Azoamicales*
