

Species *Protisticella dordognensis*^{Ts}

Etymology

[dor.do.gnen'sis] **N.L. fem. adj.** *dordognensis*, of Dordogne, referring to the Dordogne region and the Dordogne River (France), where this organism was collected with its host

Nomenclatural type

[NCBI Assembly: GCA_964213355.1](#)^{Ts}

Description

Endosymbiotic rod-shaped bacteria of a freshwater magnetotactic ciliate from the Dordogne River (France).

Classification

Bacteria » *Pseudomonadota* » *Gammaproteobacteria* » *Protisticellales* » *Protisticellaceae* » *Protisticella* » *Protisticella dordognensis*^{Ts}
