

Genus *Endelavebacter*

Etymology

[en.de.la.ve.bac'ter] **Danish n.** *Endelave*, Danish parish; **N.L. masc. n.** *bacter*, a rod; **N.L. masc. n.** *Endelavebacter*, Microbe named after the Danish parish of Endelave, near which the genome of the type species was recovered.

Nomenclatural type

Species *Endelavebacter telluricus*^{TS}

Description

Genus established on the basis of phylogenomic comparisons to GTDB R226 and 16S rRNA classifications to Silva 138.2. Formerly known as genus DASPUH01 in GTDB R226. The description of the genus is the same as for its type species *Endelavebacter telluricus*.

Classification

Bacteria » *Chloroflexota* » *Candidatus* Limnocyndria » *Candidatus* Limnocyndrales » *Klitmollerisomataceae* » *Endelavebacter*
