

## Genus *Sherwoodlollariibacterium*

---

### Etymology

[Sher.wood.lol.la.ri.i.bac.te'ri.um] L. **neut. n. bacterium**, a bacterium; **N.L. neut. n. *Sherwoodlollariibacterium***, a bacterium named for Barbara Sherwood Lollar, for her contributions to subsurface science

### Nomenclatural type

Species *Sherwoodlollariibacterium unditelluris*<sup>T5</sup>

### Description

This genus belongs to the family *Profunditerraquicolaceae*, order *Gygaellales*, class *Velamenicoccia*, phylum *Omnitrophota*. Presence of genes encoding the tight-adherence complex is variable, and large ORFs are absent from genomes assigned to the genus. Assemblies originate from lake and groundwater. The nomenclatural type for the genus is *Sherwoodlollariibacterium unditelluris*.

### Classification

*Bacteria* » *Omnitrophota* » “*Velamenicoccia*” » “*Gygaellales*” » “*Profunditerraquicolaceae*” » *Sherwoodlollariibacterium*
