

Species *Endomicrobiellum porotermitis*

Etymology

[po.ro.ter'mi.tis] N.L. gen. n. *porotermitis*, of *Porotermes*, referring to the termite host genus.

Nomenclatural type

[NCBI Assembly: GCA_031289055.1](#) ^{Ts}

Description

The species comprises only metagenome-assembled genomes. The species includes all bacteria with more than 95% average nucleotide identity (ANI) to the type genome. The GC content of the type genome is 37.2 mol% and the estimated genome size is 1.1 Mbp.

Classification

Bacteria » Elusimicrobiota » Endomicrobia » Endomicrobiales » Endomicrobiaceae » *Endomicrobiellum* » *Endomicrobiellum porotermitis*
