

Register list for 7 new names including Poseidoniales ord. nov.

Submitted by Rinke, Chris

Abstract

The register list covers the proposal of two type species; *Poseidonia* alphae (GCA_002505405.1) representing subgroup MG IIa and *Thalassarchaeum* betae (PSPG00000000) representing subgroup MG IIb. Based on these type species/genera, we further propose the families Poseidoniaceae fam. nov. and Thalassarchaeaceae fam. nov., the order Poseidoniales ord. nov. (formerly known as Marine Group II or MG II), and the class *Candidatus* Poseidoniia class nov. Note that the term *Candidatus* used in the effective publication has been omitted from the register.

Family *Poseidoniaceae*

Etymology

[Po.se.i.do.ni.a'ce.ae] N.L. **fem. n.** *Poseidonia*, referring to the type genus *Poseidonia*; *-aceae*, ending to denote a family; N.L. **fem. pl. n.** *Poseidoniaceae*, the *Poseidonia* family

Nomenclatural type

Genus *Poseidonia*

Description

The description is the same as for *Poseidonia* gen. nov. with the following additions. *Poseidoniaceae* fam. nov. was previously known as and “Group II- α ” and “Marine Group IIa”. Eleven genus-level clades I, J1, J2, J3, K1, K2, L1, L2, L3, L4, and *Poseidonia* (M) representing the rank of genera were assigned to this family. All members of the family were inferred to be marine, motile heterotrophs, encoding phototrophic and non-phototrophic lifestyles with a distribution from surface waters to the deep sea (1m-500m). Type genus: *Poseidonia* gen. nov.

Genus *Thalassarchaeum*

Etymology

[Tha.las.sar.chae'um] **Gr. fem. n.** *thalassa*, the sea; also the primeval spirit of the sea; ; **N.L. neut. n.** *archaeum*, (from Gr. adj. archaios -ê -on, ancient) archaeon; **N.L. neut. n.** *Thalassarchaeum*, the archaeon from the sea

Nomenclatural type

Species *Thalassarchaeum betae*^{Ts}

Description

Thalassarchaeum the archaeon from the sea. Inferred to be of marine origin, representing non-motile, aerobic heterotrophs containing phototrophic and non-phototrophic members. Formerly identified as **clade O** and now as **genus O4** (this study). This genus name is proposed for continuity with the orthographically incorrect "*Thalassoarchaea*" suggested by [10.1038/ismej.2014.249] for low GC MGIIb fosmid-genomes. Type species: *Thalassarchaeum betae*.
